TECHNICAL SKILLS

- **Languages:** JavaScript, Ruby
- **Technologies:** ReactJS, Ruby on Rails, Git, Bootstrap, Heroku, AWS, Wordpress, NextJS, Tailwind CSS, SQL

PROFESSIONAL EXPERIENCE

Lab @ Home | Taguig, Manila (Remote)
Software Engineer   March 2022 - May 2023
- Developed API endpoints using Rails for a medical booking website, increasing bookings by 20%.
- Developed a CSV-export feature on the admin platform using Rails.
- Developed a CSV-upload feature for patient records using ReactJS and Rails, streamlining the onboarding process for new patients.
- Implemented payment data filtering on the admin dashboard, allowing accessible payment data views.
- Integrated VAT calculation on the website's cart feature, providing transparent transactions for customers.

PROJECT WORK

Binhi | Developer | Repo | Live   2021
A Ruby on Rails application that allows the user to do inventory while having the ability to monitor the current location of deployed assets.
- Utilized the Cloudinary gem to allow users to upload plant images and add captions.
- Enabled a feature using the devise gem for user registration by entering their personal info and occupation.
- Created a feature allowing users to search for plant info by typing its scientific name or common name.
- Enabled users to add plant records in a database, as well as view the proper way to write the scientific name.

Word Game| Developer | Repo | Live   2023
A React application that is a clone of the game Wordle where a player has 6 attempts to guess a five-letter word
- Allowed players to input a word and display it on the grid.
- Enabled checking of the input word if it is the correct answer.
- Enabled checking if the input word has a letter that is part of the correct answer.
- Enabled limiting the number of guesses by the player and displayed the feedback if the player won.

Personal Website| Developer | Live
A WordPress site that showcases my personal information and web development portfolio.
- Hosted the website using Hostinger and registered my own domain name
- Utilized the Starter Templates plugin for creating the initial website template and customized it using Elementor.
